Title : Product Development - CRUD

Functional Interface:
1. Register
2. Login
3. Home
4. Product list
5. Product add
6. Product update
7. Product view
8. Product delete
9. Logout

User Guide's:

1. Landing on Site to View Login Page
   - The user navigates to the website and arrives at the login page.

2. Registering a New Account
   - The new user clicks the "Register" link located under the login form.

3. Entering User Details
   - The user fills out the registration form with the following details:
     i. First Name and Last Name: Only alphabetic letters are accepted.
     ii. Username and Email: Both fields are required.
     iii. Country, State, City: The user selects options from dropdown menus.
     iv. Languages: The user can select multiple languages via checkboxes.
     v. Password: The user creates a secure password.

4. Submitting the Registration Form
   - The user clicks the "Sign Up" button, which redirects them to the login page.

5. Logging In
   - The user enters their login credentials (email and password) on the login page to access their account.

6. Logging Out
   - The user can log out by clicking the logout option in the top right corner of the page.

7. Form Validation and Submission
   - The user clicks the "Sign Up" button. If mandatory fields are not filled, the form will highlight these fields.

Product Management

1. **Adding a New Product**
   a. Click the "New Product" button to navigate to the product creation section.
   b. Enter the product name, MRP, selling price, and product description.
   c. Upload the product image and click the "Save Product" button.

2. **Viewing a Product**
   a. Click the product name to view the product details.

3. **Updating a Product**
   a. Click the pencil icon in the action column to navigate to the update section with the existing product details.
   b. Modify the product values as needed. The product image is optional; users can either keep the existing image or upload a new one.

4. **Deleting a Product**
   a. Click the trash icon in the action column. A confirmation alert will appear, prompting the user to confirm by selecting "Yes" or "No".
